

Village hall Management Committee

The VHMC met on January 22nd 2025

No members of the public attended the start of the meeting.

The various groups using the hall reported that they continue to be well attended.

The committee received the accounts for the last 9 months, which show the VH should at least break even this current financial year. There is however significant expenditure required on the building itself (e.g. the annex roof). These capital expenses are explained in the grant application already circulated.

It was agreed to submit a grant application to the PC for the year 2025-26.

New hot water heaters for the men's & ladies' toilets are to be installed, partially funded by a generous donation from the Mardlers.

The Village Hall received a 5 star (top marks) rating for its food safety. All groups who hold 4 or more events a year and serve food are required to register their groups and will be inspected in due course. Soup & Chatter will be inspected tomorrow.

Other subjects covered included terms & conditions of the hall's hire, governance, maintenance (including the playing field), the VH Facebook page and various "housekeeping" issues.

The next meeting is on March 26th
